There are well over 220 Doosan service and sales locations operating in Canada and the United States. Moreover, there are more than 90 independent sellers moving lift truck equipment and materials handling equipment. This network allows Doosan Infracore America to aggressively compete in this competitive marketplace. The lift truck product line remarkably features 63 distinctive machines consisting of 82 various battery and engine configurations of Electric-powered and Internal Combustion vehicles. Capacities of these various vehicle designs range from 3,000 to 33,000 lbs. All vehicles are manufactured in an ISO 9001 certified facility.

Doosan Infracore America is the fastest growing forklift and lift truck corporation in the North American market, due to its excellent level of product performance and their consistently high level of client support and service given to all Doosan Infracore Lift Truck clients. The U.S. forklift division located in Cleveland has a professional team knowledgeable in Product Sales, Purchasing, Marketing, Logistical and Technical Support.

Korea's original domestic forklift market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. started to import assembled lift trucks as part of a nationwide equipment expansion project. Early product sales of this industrialized equipment focused on large business communities, the armed forces and on state-run firms. This ultimately led to a merger with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced business operations throughout Korea to service and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical instruction became the new focus for improving quality and product development.

Home-based forklift business for Daewoo started in 1967 and grew to an astonishing 90% market share in Korea. By the 1980's, Daewoo's sophisticated technological advancements combined with sales success placed them in a position of substantial expansion of their forklift business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative venture project to counter act competitive pressures in the US materials handling market. This venture greatly expanded Daewoo's forklift sales. Construction was completed in 1984 to facilitate a new plant which helped establish the business for the fabrication of high end added-value products suitable for export. In 1993, the corporation had a international sales system and started exporting versions they had developed through in-house technology, as an independent brand. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion opportunities into overseas marketplaces.
